Alejandro Melo Flores

San Luis Potosi, Mexico • +52 444 481 3992 • alejandro.meloflores@gmail.com • linkedin.com/in/alejandro-melo-flores

Systems Engineering and Applied Computer Science student with 3+ years of professional experience as a Quality Assurance Engineer, working with web and mobile development for international teams. Passionate about problem-solving, continuous learning, and professional growth, with hands-on experience in Python, TypeScript, and C. Has contributed to projects across diverse industries, including Logistics, Video Games, Research, and Infrastructure. Experienced in using AI tools to accelerate test automation and building machine learning projects with Python and OpenCV.

Education

City University of Seattle — Seattle, WA
B.S. in Applied Computer Science — Expected July 2028

Universidad Autónoma de San Luis Potosí — San Luis Potosí, Mexico
Bachelor's Degree in Systems Engineering — Expected July 2028

Universidad de Monterrey — Nuevo León, Mexico
Samsung Innovation Campus 2026: AI and Leadership — Expected February 2027

Experience

Shipwell — Remote / Mexico
Senior Quality Assurance Engineer — Jan 2024 – July 2026

- Executed an average of 150 test cases per sprint across shipment, tracking, scheduling, and transportation workflows, increasing overall test coverage by 75%.
- Validated REST APIs, webhooks, frontend behavior, and backend integrations using Postman, reducing API-related production defects by 30%.
- Collaborated with engineering and product teams to reproduce defects, validate fixes, and assess release readiness, cutting release-blocking defects by 25%.
- Reviewed and refined requirements and user stories through grooming sessions with product and engineering teams, reducing requirement-related rework by 50%.
- Reduced production bugs by 20% in the most recent sprint by strengthening regression and exploratory test coverage.
- Designed and rolled out an onboarding flow for new QA hires, cutting ramp-up time by 30%
- Leveraged AI coding assistants to generate and maintain Playwright test scripts, reducing test authoring time by 50%.

Tech Stack: TypeScript, Jira, Postman, Django, Playwright (TypeScript), Android Studio, Apple TestFlight, Confluence, REST API, swagger-ui

Blizzard Entertainment (Internship)
Quality Assurance Engineer — Aug 2024 – Jan 2025

- Performed functional, exploratory, and regression testing, identifying an average of 25 defects per testing cycle before release.
- Documented defects with clear reproduction steps, expected and actual results, and supporting evidence, reducing defect reopen rate by 20%.

Tech Stack: TypeScript, Jenkins, IntelliJ IDEA

Total Quality Logistics
Quality Assurance Engineer — Jan 2022 – Dec 2023

- Executed 110 test cases per release cycle for logistics and transportation workflows, achieving 75% coverage of critical business flows.
- Designed test scenarios and validated fixes against business requirements and acceptance criteria, reducing defect leakage to production by 40%.
- Reviewed and refined requirements and acceptance criteria through grooming sessions with product and engineering teams, cutting requirement-related defects by 30%.
- Increased manual test case coverage by 60%, improving defect detection across core workflows.
- Automated 45 test cases, increasing application reliability by 35% and reducing manual regression effort by 50%.

Tech Stack: Azure, Playwright (Python), SQL, Google Analytics, Apple TestFlight

Leadership & Activities

City University of Seattle - CityU International — Seattle, WA
Social Media Ambassador — Summer 2026

- Created content for CityU International's official Instagram during the summer program, including student interviews, travel photography, and coverage of summer activities in Seattle.
- Supported the official account's summer-program storytelling through visual content and short-form social media coverage of the international student experience.

Projects

Brawl Stars Tournament Management Discord Bot | *Node.js, Discord API, Supercell API, SQLite*

- Built a self-hosted Discord bot integrating the Discord and Supercell (Brawl Stars) APIs, automating registration and tournament management for a community of 2000+ players.
- Implemented slash commands and rank/region classification, cutting manual tournament setup time by 50%.
- Developed visual match-statistics generation and file-based participant comparison, backed by a local SQLite database, reducing admin review time by 50%.

AI/Machine Learning Facial Recognition Access Control System | *Python, OpenCV, LBPH*

- Collaborated with a 4-person team to build a local facial recognition access control prototype using Haar Cascade detection and LBPH recognition, achieving 85%+ authorization accuracy across test profiles.
- Implemented the full capture-train-recognize pipeline, processing 50+ facial images per profile to train a machine learning model.
- Delivered real-time authentication with visual pass/fail feedback, reducing manual access verification time by 70%.

Technical Skills

Programming Languages: Intermediate: Python, TypeScript, C, SQL; Basic: C#
Testing & Automation: Intermediate: Playwright, Postman; REST API Testing, Swagger UI, Jenkins
AI & Machine Learning: AI-Assisted Test Automation, AI Agents, Cursor, Claude, Copilot, OpenCV
Data Base: Intermediate: Microsoft SQL Server, PostgreSQL; Basic: MongoDB
Development & Collaboration Tools: Git, Visual Studio, Google Colab, Jira, Confluence, Azure
Languages: Native: Spanish; Advanced: English; Basic: Korean
Soft Skills: Communication, Teamwork, Adaptability, Problem Solving, Decision-Making Under Pressure
